

## The News in Kershaw.

**Chief of Police Hough Captures Blind Tiger Outfit— Handsome Furniture for Kershaw Bank—Other Matters of Interest.**

Culled from the Era.

Chief Hough made another haul Sunday and arrested Rance Brown, colored, for liquor selling. He searched Brown's house and captured a regular outfit, consisting of jugs, measure and funnel. He also arrested Henry Massey, col., on same charge and both are in the guard house, having failed to give bond.

The new fixtures for the Bank of Kershaw are being installed by an expert mechanic from the factory where they were purchased. The front of the counter will be marble and all the wood work of counters and desks is fine piano finish. The Kershaw bank will now be one of the best and most handsomely furnished banks in this section.

Editor Connors ought, out of the abundance of his generosity, to install a radiator on this side of Lancaster so we can share his warmth. Its too selfish to enjoy it all himself. And, while he is about it, he might shoo! one of his home raised thanksgiving turkeys down the line, too.

Mrs. J. H. W. Stevens, of Cheraw, who was visiting her children, Mr. J. T. Stevens and Mrs. L. S. Davidson, left for her home Saturday in response to a message that her son Mr. Jas. H. Stevens, who was in Colorado for his health, had grown worse and was returning home.

Mr. J. M. Lowry, Sec. and Treas. of the Mutual Benevolent Association, last week paid to Mrs. E. S. McDow the amount of insurance carried by her husband in that organization.

Mrs. O. A. Jeffcoat and child left yesterday to visit Mrs. Jeffcoat's parents, at Sharon during the stay of Rev. O. A. Jeffcoat at Conference in Columbia.

Mr. J. Dixon Rollings left Friday for Spartanburg to finish his business course which he was forced to discontinue some time ago on account of his health.

Mrs. J. F. Hunter, Jr., and two children, of Lancaster, spent from Sunday until yesterday in Kershaw with Mrs. Hunter's sister, Mrs. T. B. Clyburn.

Mrs. Mattie Spearman, of Newberry, who had been visiting her niece, Mrs. E. V. Truesdlae, returned home yesterday.

Mrs. Daisy B. Hasseltine went to the Rock Hill hospital Saturday for treatment.

Mrs. J. B. Sims, of Lancaster, visited her mother, Mrs. Sarah E. Floyd, last week.

Mr. and Mrs. J. F. Hammond, who lived near Kershaw, moved to Wingate, N. C., last week.

Miss Grace Brasington, of the Antioch section, visited at Mr. J. Wylie Porter's last week.

## Dairy Notes.

Live Stock Journal.

Buttermilk destroys the keeping quality of butter.

Churn promptly when the cream is ready to churn.

Nothing else takes account of filthiness and holds to it like milk and butter.

Milk keeps better even in cool weather if cooled at once after being drawn from the cow.

It is a dead loss to allow milk to sour before skimming unless the cream can be churned at once.

Absolute cleanness is essential about the dairy and any departure from this is detrimental to the product.

When we feed the cow a variety of grains we come nearer to feeding an evenly balanced food than if we fed only one kind.

The best method to obtain perfect granulations is to have the cream well aired and churn at the first stages of acidity.

Old cows do not respond as younger ones do to the food they consume. The young cow is ready to give a full account of all she eats, if she is a good cow.

To make good butter it is necessary to churn often and not let the cream stand after it has reached the proper conditions. When ripening an occasional stirring will do much to prevent white specks in the butter.

Good food never indicates the character nor temperament of a cow, nor makes her a good dairy animal any more than it will never make a good cow out of a small milker, and there is no wasting effect.

Uniformity of feed is required in order to keep the cows to a uniform production. Every time they fall back a little it will require twice the ordinary feeding and care to bring them to their former standard.

If you want the heifer to develop into a profitable cow, you must extend her first milking period as long as possible in order to promote and fix the milking habit. A dairy cow to be really profitable must give a good yield of milk for at least ten months in the year, and very much depends upon her treatment the first year in securing this.

## Murder at a Frolic.

At a dance on Mr. S. M. B. Stroud's place Friday night, which lasted until the early hours Saturday morning, Bert Wilson got to shooting around and when remonstrated with he asked what any one had to do with it. When Maggie Knox made some remark about "these Wilson niggers," he fired at her but missed and killed Bessie Woodward. Richard Dixon took hold of him but he escaped, some say by the help of others, and is still at large. — Chester Lantern.

## A Year of Blood.

The year 1903 will long be remembered in the home of F. N. Tackett, of Alliance, Ky., as a year of blood; which flowed so copiously from Mr. Tackett's lungs that death seemed very near. He writes: "Severe bleeding from the lungs and a frightful cough had brought me at death's door, when I began taking Dr. King's New Discovery for Consumption, with the astonishing result that after taking four bottles I was completely restored and as time has proven permanently cured." Guaranteed for Sore Lungs, Coughs and Colds, at J. F. Mackey Co., Crawford Bros., and Funderburk Pharmacy.
